The Citation Bravo has excellent take-off and landing performance. It can operate from short runways.

The latest avionics and safety features, including traffic collision and ground proximity warning systems, are incorporated into the Citation Bravo making it a state-of-the-art aircraft on a par with today's most advanced airliners.

With up-rated engines, the Bravo can speed its way further across Europe than its rivals whilst still providing impressive cost efficiency synonymous with this aircraft.

The extra performance allows access to more local airports and therefore brings you closer to your destination.
